## COPYING

The *Journal* is registered with the Copyright Clearance Center, 27 Congress St., Salem, Mass. 01970. Organizations in the USA which are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to C.C.C. of the per-copy fee of $5.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0022-1120/89/$5.00 + .00

ISI Tear Sheet Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA is authorized to supply single copies of separate articles for private use only.

For all other use of material from the *Journal* permission should be sought from Cambridge or the American Branch of Cambridge University Press.

## SUBSCRIPTIONS

The JOURNAL OF FLUID MECHANICS (ISSN 0022-1120) is published by the Cambridge University Press in 12 volumes each year. All orders must be accompanied by payment. Single volumes cost £38 net (US $75 in the USA and Canada) plus postage. The subscription price in the UK (which includes postage) to volumes 198–209, 1989, is £410, £450 elsewhere (US $880 in the USA and Canada) for institutions: £225 (US $450) for individuals. Copies of the journal for subscribers in the USA and Canada are sent by air to New York. Second class postage is paid at New York, NY, and at additional mailing offices. Claims for missing issues will be considered only if made immediately upon receipt of the subsequent issue. Copies of back numbers are available from Cambridge University Press. POSTMASTER: send address changes in USA and Canada to *Journal of Fluid Mechanics*, Cambridge University Press, 510 North Avenue, New Rochelle, NY 10801.

# INDEX OF AUTHORS OF PAPERS

**Abarbanel, H. D. I.**
Universality and strange attractors in internal-wave dynamics, **135**, 1983, 407–434

**Abboud, M.**
Theoretical study of the transonic flow past wedge profiles with detached shock waves, **146**, 1984, 181–201
*See also* Lugt & Abboud

**Abedian, B. & Sonin, A. A.**
Theory for electric charging in turbulent pipe flow, **120**, 1982, 199–217

**Abernathey, J. R. & Rosenberger, F.**
Time dependent convective instabilities in a closed vertical cylinder heated from below, **160**, 1985, 137–154

**Abernathy, F. H.** *See* Bertschy, Chin & Abernathy; Chin, Abernathy & Bertschy; Keyes & Abernathy; Pearson & Abernathy

**Abouseif, G. E. & Toong, T. Y.**
Nonlinear wave–kinetic interactions in irreversibly reacting media, **103**, 1981, 1–22

**Abrams, J. & Hanratty, T. J.**
Relaxation effects observed for turbulent flow over a wavy surface, **151**, 1985, 443–455

**Acarlar, M. S. & Smith, C. R.**
A study of hairpin vortices in a laminar boundary layer. Part 1. Hairpin vortices generated by a hemisphere protuberance, **175**, 1987, 1–41
A study of hairpin vortices in a laminar boundary layer. Part 2. Hairpin vortices generated by fluid injection, **175**, 1987, 43–83

**Achard, J.-L., Drew, D. A. & Lahey, R. T.**
The analysis of nonlinear density-wave oscillations in boiling channels, **155**, 1985, 213–232

**Achard, J.-L. & Lespinard, G. M.**
Structure of the transient wall-friction law in one-dimensional models of laminar pipe flows, **113**, 1981, 283–298

**Achenbach, E. & Heinecke, E.**
On vortex shedding from smooth and rough cylinders in the range of Reynolds numbers $6 \times 10^3$ to $5 \times 10^6$, **109**, 1981, 239–251

**Acosta, A. J.** *See* Agostino, Brennen & Acosta

**Acrivos, A.** *See* Brady & Acrivos; Herbholzheimer & Acrivos; Leighton & Acrivos

**Acrivos, A., Hinch, E. J. & Jeffrey, D. J.**
Heat transfer to a slowly moving fluid from a dilute fixed bed of heated spheres, **101**, 1980, 403–421

**Adamson, T. C. & Sichel, M.**
Transonic shear flow in a three-dimensional channel, **123**, 1982, 443–457

**Adrian, R. J.** *See* Buckles, Hanratty & Adrian

**Adrian, R. J. & Moin, P.**
Stochastic estimation of organized turbulent structure: homogeneous shear flow, **190**, 1988, 531–559

**Afzal, N.**
Mixed convection in a two-dimensional buoyant plume, **105**, 1981, 347–368

**Agnon, Y., Choi, H. S. & Mei, C. C.**
Slow drift of a floating cylinder in narrow-banded beam seas, **190**, 1988, 141–163

**Agnon, Y. & Mei, C. C.**
Slow-drift motion of a two-dimensional block in beam seas, **151**, 1985, 279–294
Excitation of long internal waves by groups of short surface waves incident on a barrier, **192**, 1988, 17–31
Trapping and resonance of long shelf waves due to groups of short waves, **195**, 1988, 201–221

**Agostino, L. d' & Brennen, C. E.**
Linearized dynamics of spherical bubble clouds, **199**, 1989, 155–176

**Agostino, L. d', Brennen, C. E. & Acosta, A. J.**
Linearized dynamics of two-dimensional bubbly and cavitating flows over slender surfaces, **192**, 1988, 485–509

**Agrawal, S. & Messiter, A. F.**
Turbulent boundary-layer interaction with a shock wave at a compression corner, **143**, 1984, 23–46

**Agüí, J. C. & Hesselink, L.**
Flow visualization and numerical analysis of a coflowing jet: a three-dimensional approach, **191**, 1988, 19–45

**Agüí, J. C. & Jimenez, J.**
On the performance of particle tracking, **185**, 1987, 447–468

**Ahlers, G.** *See* Behringer & Ahlers; Walden & Ahlers

**Ahlers, G., Cross, M. C., Hohenberg, P. C. & Safran, S.**
The amplitude equation near the convective threshold: application to time-dependent heating experiments, **110**, 1981, 297–334

**Ahmadi, A. R. & Widnall, S. E.**
Unsteady lifting-line theory as a singular-perturbation problem, **153**, 1985, 59–81
Energetics and optimum motion of oscillating lifting surfaces of finite span, **162**, 1986, 261–282

**Ahrens, M.** *See* Yoo, Ahrens & Joseph
**Aidun, C. K.** *See* Steen & Aidun
**Ajayi, O. O., Sozou, C. & Pickering, W. M.**
Nonlinear fluid motions in a container due to the discharge of an electric current, **148**, 1984, 285–300
**Akamatsu, T.** *See* Fujikawa, Okuda, Akamatsu & Goto; Matsushita, Murata & Akamatsu; Takano & Akamatsu
**Akylas, T. R.**
Large-scale modulations of edge waves, **132**, 1983, 197–208
On the excitation of long nonlinear water waves by a moving pressure distribution, **141**, 1984, 455–466
Unsteady and nonlinear effects near the cusp lines of the Kelvin ship-wave pattern, **175**, 1987, 333–342
Higher-order modulation effects on solitary wave envelopes in deep water, **198**, 1989, 387–397
*See also* Katsis & Akylas; Toplosky & Akylas
**Akylas, T. R. & Demurger, J.-P.**
The effect of rigid rotation on the finite-amplitude stability of pipe flow at high Reynolds number, **148**, 1984, 193–205
**Albert, B. S.** *See* Lowe, Albert & Gollub
**Alfredsson, P. H.** *See* Henningson & Alfredsson; Johansson & Alfredsson
**Alfredsson, P. H. & Johansson, A. V.**
On the detection of turbulence-generating events, **139**, 1984, 325–345
**Al-Homoud, A. A.** *See* Bejan, Al-Homoud & Imberger
**Allison, H.**
Streaming of fluid under a near-bottom membrane, **137**, 1983, 385–392
**Althaus, R. & Thomann, H.**
Oscillations of a gas in a closed tube near half the fundamental frequency, **183**, 1987, 147–161
**Altman, D. B.**
Critical layers in accelerating two-layer flows, **197**, 1988, 429–451
**Al-Zanaidi, M. A. & Hui, W. H.**
Turbulent airflow over water waves–a numerical study, **148**, 1984, 225–246
**Alziary de Roquefort, T.** *See* Bonnet, Jayaraman & Alziary de Roquefort
**Ambari, A., Gauthier-Manuel, B. & Guyon, E.**
Wall effects on a sphere translating at constant velocity, **149**, 1984, 235–253
**Amberg, G. & Dahlkild, A. A.**
Sediment transport during unsteady settling in an inclined channel, **185**, 1987, 415–436
**Amberg, G., Dahlkild, A. A., Bark, F. H. & Henningson, D. S.**
On time-dependent settling of a dilute suspension in a rotating conical channel, **166**, 1986, 473–502
**Amberg, G. & Greenspan, H. P.**
Boundary layers in a sectioned centrifuge, **181**, 1987, 77–97
**Amen, R. & Maxworthy, T.**
Corrigendum to 'The gravitational collapse of a mixed region into a linearly stratified fluid, vol. 96 (1980), pp. 65–80', **121**, 1982, 533
**Amiet, R. K.**
Thickness noise of a propeller and its relation to blade sweep, **192**, 1988, 535–560
**Andereck, C. D., Liu, S. S. & Swinney, H. L.**
Flow regimes in a circular Couette system with independently rotating cylinders, **164**, 1986, 155–183
**Anderson, J. L.** *See* Keh & Anderson; Prieve, Anderson, Ebel & Lowell
**Anderson, J. L., Lowell, M. E. & Prieve, D. C.**
Motion of a particle generated by chemical gradients. Part 1. Non-electrolytes, **117**, 1982, 107–121
**Anderson, K. E.** *See* Motsay, Anderson & Behringer
**Andreopoulos, J.**
On the structure of jets in a crossflow, **157**, 1985, 163–197
**Andreopoulos, J. & Muck, K.-C.**
Some new aspects of the shock-wave/boundary-layer interaction in compression-ramp flows, **180**, 1987, 405–428
**Andreopoulos, J., Praturi, A. & Rodi, W.**
Experiments on vertical plane buoyant jets in shallow water, **168**, 1986, 305–336
**Andreopoulos, J. & Rodi, W.**
Experimental investigation of jets in a crossflow, **138**, 1984, 93–127
**Andreopoulos, J. & Wood, D. H.**
The response of a turbulent boundary layer to a short length of surface roughness, **118**, 1982, 143–164
**Andrews, D. G.**
A note on potential energy density in a stratified compressible fluid, **107**, 1981, 227–236
**Andrews, E. D.** *See* Parker & Andrews
**Angell, T. S., Hsiao, G. C. & Kleinman, R. E.**
An integral equation for the floating-body problem, **166**, 1986, 161–171
**Annamalai, P., Trinh, E. & Wang, T. G.**
Experimental study of the oscillations of a rotating drop, **158**, 1985, 317–327
**Ansari, A. & Morris, S.**
The effects of a strongly temperature-dependent viscosity on Stokes's drag law: experiments and theory, **159**, 1985, 459–476

**Anselmet, F.** *See* Antonia, Anselmet & Chambers; Antonia, Fulachier, Krishnamoorthy, Benabid & Anselmet

**Anselmet, F., Gagne, Y., Hopfinger, E. J. & Antonia, R. A.**
High-order velocity structure functions in turbulent shear flows, **140**, 1984, 63–89

**Antar, B. N. & Fowlis, W. W.**
Three-dimensional baroclinic instability of a Hadley cell for small Richardson number, **137**, 1983, 423–445

**Antonia, R. A.** *See* Anselmet, Gagne, Hopfinger & Antonia; Browne, Antonia & Chambers; Browne, Antonia & Shah; Krishnamoorthy & Antonia; Rajagopalan & Antonia; Sankaran, Sokolov & Antonia; Sokolov, Antonia & Chambers; Subramanian, Rajagopalan, Antonia & Chambers

**Antonia, R. A., Anselmet, F. & Chambers, A. J.**
Assessment of local isotropy using measurements in a turbulent plane jet, **163**, 1986, 365–391

**Antonia, R. A. & Browne, L. W. B.**
The destruction of temperature fluctuations in a turbulent plane jet, **134**, 1983, 67–83
Anisotropy of the temperature dissipation in a turbulent wake, **163**, 1986, 393–403

**Antonia, R. A., Browne, L. W. B., Bisset, D. K. & Fulachier, L.**
A description of the organized motion in the turbulent far wake of a cylinder at low Reynolds number, **184**, 1987, 423–444

**Antonia, R. A., Browne, L. W. B., Rajagopalan, S. & Chambers, A. J.**
On the organized motion of a turbulent plane jet, **134**, 1983, 49–66

**Antonia, R. A., Browne, L. W. B. & Shah, D. A.**
Characteristics of vorticity fluctuations in a turbulent wake, **189**, 1988, 349–365

**Antonia, R. A., Chambers, A. J., Britz, D. & Browne, L. W. B.**
Organized structures in a turbulent plane jet: topology and contribution to momentum and heat transport, **172**, 1986, 211–229

**Antonia, R. A., Chambers, A. J., Sokolov, M. & Van Atta, C. W.**
Simultaneous temperature and velocity measurements in the plane of symmetry of a transitional turbulent spot, **108**, 1981, 317–343

**Antonia, R. A. & Fulachier, L.**
Topology of a turbulent boundary layer with and without wall suction, **198**, 1989, 429–451

**Antonia, R. A., Fulachier, L., Krishnamoorthy, L. V., Benabid, T. & Anselmet, F.**
Influence of wall suction on the organized motion in a turbulent boundary layer, **190**, 1988, 217–240

**Antonia, R. A., Rajagopalan, S., Subramanian, C. S. & Chambers, A. J.**
Reynolds-number dependence of the structure of a turbulent boundary layer, **121**, 1982, 123–140

**Antonia, R. A., Satyaprakash, B. R. & Hussain, A. K. M. F.**
Statistics of fine-scale velocity in turbulent plane and circular jets, **119**, 1982, 55–89

**Antonopoulos-Domis, M.**
Large-eddy stimulation of a passive scalar in isotropic turbulence, **104**, 1981, 55–79

**Apelt, C. J.** *See* West & Apelt

**Appleby, J. C. & Crighton, D. G.**
Internal gravity waves generated by oscillations of a sphere, **183**, 1987, 439–450

**Arakeri, V. H. & Shanmuganathan, V.**
On the evidence for the effect of bubble interference on cavitation noise, **159**, 1985, 131–150
Existence and some properties of waves trapped by submerged cylinders, **192**, 1988, 421–433

**Aranha, J. A. P.**
Excitation of waves trapped by submerged slender structures, and nonlinear resonance, **192**, 1988, 435–453

**Aranha, J. A. P. & Sugaya, M.**
A note on head-sea diffraction by a slender body, **155**, 1985, 131–139
Diffraction of sea waves by a slender body. Part 1. The shallow-water limit, **180**, 1987, 51–85

**Aranha, J. A. P., Yue, D. K. P. & Mei, C. C.**
Nonlinear waves near a cut-off frequency in an acoustic duct – a numerical study, **121**, 1982, 465–485

**Arbey, H.** *See* Huot, Rey & Arbey

**Arbey, H. & Bataille, J.**
Noise generated by airfoil profiles placed in a uniform laminar flow, **134**, 1983, 33–47

**Arbey, H. & Ffowcs Williams, J. E.**
Active cancellation of pure tones in an excited jet, **149**, 1984, 445–454

**Aref, H.**
Stirring by chaotic advection, **143**, 1984, 1–21
The numerical experiment in fluid mechanics, **173**, 1986, 15–41
*See also* Tryggvason & Aref

**Aref, H. & Flinchem, E. P.**
Dynamics of a vortex filament in a shear flow, **148**, 1984, 477–497

**Aref, H. & Kambe, T.**
Report on the IUTAM symposium: fundamental aspects of vortex motion, **190**, 1988, 571–595

**Aref, H. & Siggia, E. D.**
Evolution and breakdown of a vortex street in two dimensions, **109**, 1981, 435–463
**Arie, M.** *See* Kiya, Sasaki & Arie; Kiya, Suzuki, Arie & Hagino; Kiya, Tamura & Arie; Sakamoto & Arie
**Arita, M.** *See* Jirka & Arita
**Armaly, B. F., Durst, F., Pereira, J. C. F. & Schönung, B.**
Experimental and theoretical investigation of backward-facing step flow, **127**, 1983, 473–496
**Armi, L.**
The hydraulics of two flowing layers with different densities, **163**, 1986, 27–58
*See also* Farmer & Armi; Hedstrom & Armi
**Armi, L. & Farmer, D. M.**
Maximal two-layer exchange through a contraction with barotropic net flow, **164**, 1986, 27–51
